FIRE DETECTOR HARNESS

CFM56-7B

Fire detector harnesses route the fire detection signal across the hot section of the engine to the pylon.

DESCRIPTION

01

Meggitt has developed a silicon-dioxide cable to replace organic cables:

- Mechanically rugged
- Can endure the most hostile environments

Fit & Forget solution

- MTBF at 400,000FH
- 5-year warranty

Upgrade your engines at a low cost

- Performed on-wing or in shop.
- Discounts for upgrading fleets.
- Kits available with all required parts.

KEY BENEFITS & FEATURES

02

- Lower maintenance costs with an MTBF increasing from 18,000FH to 400,000FH.
- Reliability increases, especially when used in conjunction with our upgraded fire detectors.

APPLICATIONS

03

CFM56-7B

- Boeing SB 737-26-1142
- CFM SB 72-0981
- Meggitt SB 26-44
- Kits PN 909952-01, 909952-02 include harnesses PN 8960-01-002, 8960-02-002 and other piece parts
