

# RADOME REPAIR CAPABILITIES

- Boeing
- Airbus
- Cessna
- Embraer
- BAE
- Bombardier
- Dassault
- Gulfstream
- ATR families

## DESCRIPTION

01

Original Equipment Manufacturer capability, "Structural Repair Manual" and "Component Maintenance Manual" authorised repairs, leading to cost effective, airworthiness-approved solutions, that extend life and reduce requirement for extensive radome repair.

## KEY BENEFITS & FEATURES

02

### Regular light repair

- Fluff and buff repair at scheduled intervals before significant degradation has occurred rather than a big repair that does not fully restore transmissivity.
- Keep on wing, reduce scrap, more light repairs over lifetime provide you with a better quality product and extend life.

### On-wing team

- Prevent removal by on-wing technician carrying out inspection at aircraft

### Standard worksopes

- Quicker quote turntime, repeatable quality, guaranteed price and TAT.
- Predictable transmissivity.

### Exchange, loan or lease

- Replacement units for scrap components.
- Loan or lease a unit to avoid schedule disruption.
- Standard colour – two day service
- Colour matched – seven day service
- Meggitt quality and transmissivity guaranteed.
