# MAIN BATTERY STC AIRBUS A320 SERIES

100-2849-01

## 01 Description

Meggitt's sealed lead acid (SLA) mainship batteries for the Airbus A320 Series

Form / Fit / Function

- Direct replacement for existing Ni-cad or sealed lead acid battery.

Superior Hot and Cold weather performance

- Cold Weather: 50% more cold cranking than any other equivalent aviation battery at -40 C/F
- Hot Weather: Designed for hot weather operation. With an expected life of over 3 years at 40 C/F

Ability to recover from Deep Discharge

- The internal battery and thin tin plate technology allows for the battery to recover from deep discharge with exceptional recharge retention.

Reblock capabilities

- Battery is reblocked instead of replaced at end of life. A 24-months warranty is renewed at reblocking. Re-Block kit p/n F9250-0101
